

Darren Mabbayad

Front End Developer, UI/UX Design

I am an Electrical/Computer Engineering Technology graduate that decided to learn about website making. I've always been one to enjoy taking the time to make things look beautiful in whatever project I am working on so Front End development was naturally what I gravitated towards. Going the self taught route has been difficult but I have been able to stay motivated and I am excited to learn more.

HTML5

CSS/SCSS

VHDL Prototyping

Microcontroller
Programming

Multisim

OrCAD

EDUCATION

Bachelor of Science in Electrical and Computer Engineering Technology New York Institute of Technology

2018 – 2019

GPA: 3.69

Bachelor of Science in Computer Engineering Technology Rochester Institute of Technology

2014 – 2017

GPA: 3.51

PERSONAL PROJECTS

Vacation Brochure Site (React, Gatsby) <https://github.com/darrenMabbayad/brochure-site>

- A site with the premise of providing information about vacation activities in El Salvador and getting the user to contact the website guides for assistance in planning a trip there
- Built with Gatsby to utilize lazy image loading, smooth page transitions, display static content through markdown files, and to make use of Contentful to display content on different pages
- Custom CSS, organized through SCSS partials
- Responsive down to 300 VW

Personal Portfolio (React) <https://devmabbayad.netlify.com/>

- Static website, hosted through Github Pages
- Two distinct layouts, one for above and below 800 VW
- Custom CSS

Discord Bot (JavaScript) <https://github.com/darrenMabbayad/discord-multi-use-bot>

- A multi-functional bot for the Discord app
- Has user commands to get weather information, set reminders, etc.
- Provides server administrator commands for making announcements, clearing chat logs, etc.

Layout App (React, SCSS) <https://github.com/darrenMabbayad/layout-maker-responsive>

- A simple app with preset layouts where the user can change the colors of each section to test color schemes
- Uses the react-color library to create color pickers -- <https://casesandberg.github.io/react-color/>
- Buttons to change fonts inside each layout, enable/disable borders, color fill, etc.
- Responsive down to 300 VW
